Index of Subjects

Actinobacillus pleuropneumoniae, transmission of, in pigs is characterized by variation in infectivity, 203
AIDS, regional and temporal changes in, in Europe before HAART, 565
Antibiotic use, gastroenteritis and respiratory illness in South Australian children, 507
Anti-RESA, inter-test reliability of the, indices based on ELISA tests using eluates from whole blood spots dried on filter paper, 139
Anti-retroviral therapy, initiation, changes in use and effectiveness of highly active, in a cohort of injecting drug users, 325

Bartonella, New World origins for haemoparasites infecting United Kingdom grey squirrels (*Sciurus carolinesis*), as revealed by phylogenetic analysis of, infecting squirrel populations in England and the United States, 647
Bioterrorism, testing a symptom-based surveillance system at high-profile gatherings as a preparatory measure for, 429
Borrelia burgdorferi, detection of four, genospecies and first report of human granulocyte ehrlichiosis agent in *Ixodes ricinus* ticks collected in central Italy, 93
B. pertussis, kinetics of the IgG antibody response to pertussis toxin after infection with, 479
***Brucella* spp.**, prevalence of antibodies to, and risk factors related to high-risk groups in Eritrea, 85

Campylobacter jejuni, high resolution genotyping of, strains by macrorestriction analysis with *Xho*I and polymerase chain reaction targeting enterobacterial repetitive intergenic consensus sequences: can we predict the zoonotic potential of strains, 435
Campylobacter, molecular epidemiology of nalidixic acid-resistant, isolates from humans and poultry by pulsed-field gel electrophoresis and flagellin gene analysis, 227
Campylobacters, prevalence of, in chicken flocks during the summer of 1999 in Finland, 187
Campylobacter, salmonella and, contamination of raw retail chickens from different producers: a six year survey, 635
Cercarial dermatitis, investigation of an outbreak of, 379
C/hepatitis G virus, the prevalence of TT virus and GB virus, infection in individuals with raised liver enzymes but without HBV or HCV infection in Taiwan, 307
Chickenpox, immunity to, among school adolescents in Lebanon and options for vaccination, 607

Diarrhoeal illness, a population-based estimate of the burden of, in the United States: FoodNet, 1996–7, 9
Diphtheria, age-specific seroprevalence of poliomyelitis, and tetanus antibodies in Spain, 535

***E. coli* O157**, phage type 21/28 outbreak in North Cumbria associated with pasteurized milk, 451

Enterococci, the epidemiology of glycopeptide-resistant, on a haematology unit – analysis by pulsed-field gel electrophoresis, 57
Enterococcus casseliflavus, nucleotide substitutions in *vanC-2* gene of, isolates obtained from chickens, 421
Escherichia coli, a long-term study on the prevalence of shiga toxin-producing, (STEC) on four German cattle farms, 173
Escherichia coli, faecal contamination and entero toxigenic, in street-vended chili sauces in Mexico and its public health relevance, 223
Escherichia coli, isolation and characterization of enterohaemorrhagic, O157:H7 from cattle in Belgium and Poland, 41
***Escherichia coli* O157**, infection associated with a petting zoo, 295
***Escherichia coli* O157:H7**, infection in cows and calves in a beef cattle herd in Alberta, Canada, 163

GB virus, the prevalence of TT virus and, C hepatitis G virus infection in individuals with raised liver enzymes but without HBV or HCV infection in Taiwan, 307
Group A streptococcal, intra-familial transmission of life-threatening, infection, 303

Haemophilus influenzae, type b and cross-reactive antigens in natural Hib infection dynamics; modelling in two populations, 73
HCV, the contribution of transfusion to, infection in England, 587
Hepatitis A, an outbreak of, among homosexuals linked to a family outbreak, 113
Hepatitis C, evaluation of, surveillance in Poland in 1998, 119
Hepatitis C, monitoring, virus infection among injecting drug users in the European Union: a review of the literature, 577
HIV, associations between water-treatment methods and diarrhoea in, -positive individuals, 315

Influenza A (H3N2), phylogenetic and antigenic analysis of, viruses isolated from conscripts receiving influenza vaccine prior to the epidemic season of 1998/9, 347
Influenza, comparison between cohorts vaccinated and unvaccinated against, and pneumococcal infection, 515
Influenza, the incidence of, -associated hospitalizations in children in Germany, 525

Leptospirosis, evaluation of Lepto Dri Dot as a rapid test for the diagnosis of, 617

Malaria, underreporting of, incidence in the Netherlands: results from a capture-recapture study, 371
Measles, epidemiology of, in Blantyre, Malawi: analyses of passive surveillance data from 1996 to 1998, 361
Measles, epidemiology of, mumps and rubella in Italy, 543

Meningococcal disease, national enhanced surveillance of, in England, Wales and Northern Ireland, January 1999–June 2001, 459
Mumps, epidemiology of measles, and rubella in Italy, 543
Mumps, outbreak in vaccinated children in Gipuzkoa (Basque Country), Spain, 551

Newcastle disease virus, the occurrence of five major, genotypes (II? IV? V? VI and VIIb) in Bulgaria between 1959 and 1996, 679
Norwalk-like calcivirus, a prolonged outbreak of, (NLV) gastroenteritis in a rehabilitation centre due to environmental contamination, 133
Norwalk-like virus, a large hotel outbreak of, gastroenteritis among three groups of guests and hotel employees in Virginia, 127

Onchocerciasis, local knowledge and attitudes about, in Oji-River local government area of Enugu State, Nigeria, 629

Poliomyelitis, age-specific seroprevalence of, diphtheria and tetanus antibodies in Spain, 535
Poliovirus, partial VP1/2A gene sequence based molecular epidemiology of wild type 1, isolates from some parts of India, 107
Pneumococcal, comparison between cohorts vaccinated and unvaccinated against influenza and, infection, 515
Pneumococcal, is household antibiotic use a risk factor for antibiotic-resistant, infection, 499
Pneumococci, nasopharyngeal carriage of resistant, in young South Indian infants, 491
Pneumonia, risk factors for, in infants and young children and the role of solid fuel for cooking: a case-control study, 65

Rabbit haemorrhagic disease virus, epidemiological consequences of a pathogen having both virulent and avirulent modes of transmission: the case of, 665
Rabbit haemorrhagic disease virus, evidence for insect transmission of, 655
Rabies, comparison of vaccination strategies for the control of dog, in Machakos District, Kenya, 215
RSV, contribution of, to bronchiolitis and pneumonia-associated hospitalizations in English children, April 1995–March 1998, 99
Rubella, antibody loss rates in Korean children, 557
Rubella, epidemiology of measles, mumps and, in Italy, 543

Salmonella and campylobacter, contamination of raw retail chickens from different producers: a six year survey, 635
Salmonella, drug resistances in, isolates from animal foods, Italy 1998–2000, 155
Salmonella enteritidis, an outbreak of, phage type 34a infection in primary school children: the use of visual aids and food preferences to overcome recall bias in a case control study, 35
Salmonella, risk factors for, food poisoning in the domestic kitchen – a case control study, 277
Salmonella, routes for, contamination of poultry meat: epidemiological study from hatchery to slaughterhouse, 253
Salmonella surveillance: a global survey of public health serotyping, 1
***Salmonella* Typhi**, decline in epidemic of multidrug resistant, is not associated with increased incidence of antibiotic-susceptible strain in Bangladesh, 29
Salmonellosis, human, associated with young poultry from a contaminated hatchery in Michigan and the resulting public health interventions, 1999 and 2000, 19
Salmonellosis, relationship between home food-handling practices and sporadic, in adults in Louisiana, United States, 267
Salmonellosis, the use of sequential studies in a, outbreak linked to continental custard cakes, 287
Shigellae, shifting serotypes, plasmid profile analysis and antimicrobial resistance pattern of, strains isolated from Kolkata, India during 1995–2000, 235
Shigella flexneri, use of AFLP, plasmid typing and phenotyping in a comparative study to assess genetic diversity of, strains, 445
Sindbis virus, epidemiology of, infections in Finland 1981–96: possible factors explaining a peculiar disease pattern, 335
Staphylococcus aureus, a mathematical model of, control in dairy herds, 397
Staphylococcus aureus, nasal carriage in the community: a survey from central Italy, 417
Staphylococcus aureus, use of pulsed-field gel electrophoresis for detecting differences in, strain populations between dairy herds with different cattle importation practices, 387
Streptococcal, invasive group A, infections in the San Francisco Bay area, 1989–99, 471

Tetanus, age-specific seroprevalence of poliomyelitis, diphtheria and, antibodies in Spain, 535
Transmission, a clarification of, terms in host-microparasite models: numbers, densities and areas, 147
TT virus, the prevalence of, and GB virus C/hepatitis G virus infection in individuals with raised liver enzymes but without HBV or HCV infection in Taiwan, 307
Tuberculosis, predicting, among migrant groups, 623

Varicella, in non-immune persons: incidence, hospitalization and mortality rates, 599
Vibrio cholerae, preferential association of the heat-stable enterotoxin gene (*stn*) with environmental strains of, belonging to the O14 serogroup, 245
Viral gastroenteritis, an outbreak of, following environmental contamination at a concert hall, 355

Zoster, the role of solar ultraviolet irradiation in, 593
